Here is the line you need to put in your post to display an image on the forum.

[img]http://www.tcrcboaters.org/images/forum/xxxxxxxx.jpg[/img]

xxxxxxxx.jpg must be the exact name of your image. I would suggest an image no larger than 480x320 but I can adjust that when you send me the images.

Please note - Spaces are NOT allowed in file names so be sure and use an underline _ for any spaces.

Unfortunately you will need to send me the images so I can put them in the "images" file on our website. Trying to find out if there is a way the user can do this rather than having to send the images to me.

If you want me to do it, just send me the images and I can put them in your post.

Regards,
Bud - Webmaster
